Math Certification

Math certification will usually be completed in the sophomore year, but must be completed prior to the senior year. Students may satisfy the Math certification requirement in one of five ways:

1. Successful completion of a mathematics course at Prescott College. See individual department Advising Documents for specific requirements for particular areas of the curriculum (e.g. Applied Algebra for the BA in environmental studies, Calculus for BS Degree).

2. Successful completion (“C” or better) of a college-level (College Algebra or equivalent) mathematics course taken at another regionally accredited college or university. Other college-level mathematics courses may satisfy the math certification requirement pending review of course descriptions.

3. Successful completion (“C” or better) within five (5) years of entering the College of a Pre-calculus or Calculus course taken in high school.

4. A qualifying score of four (4) or better on the Advanced Placement (AP) Exam in Calculus.

5. Score 50 or higher on the College Board’s CLEP test in any of the following: Calculus, College Algebra, or College Mathematics; the course should be consistent with department requirements. Consult the CLEP website for more information at http://clep.collegeboard.org/exam. Passing CLEP scores also result in transfer credit.
